>> *The new industrial endoscopes for demanding users*

>> HIPP Micro Borescope flexible

Description:

Flexible micro endoscopes, with selectable working lengths and diameters of 0.5 to 4.5mm. Optional with articulation.

Special features:

- individually selectable working lengths
- resolution: up to 10,000 pixel
- field of view: wide-angle, 70°
- stainless steel coat with PVC-protection: solid, oil and water resistant and easy to clean.
- focusable
- purpose-built aluminium/plastic case included in delivery

Fields of application:

For the examination of cavities which are angular and difficult to get to through smallest openings in the do-it-yourself field. For the inspection of material defects and defects in the airplane and automobile construction field and in the micro system technology.

Description	Length	Ø	Filed of View	Dir. of View	Resolution	Focus	Articulation	Article number
Flexible Micro Borescope	600 mm	1,8 mm	70°	0°	10000 pixel	yes	—	HT-0600-18-FM
