

# Quality and Precision

## Highest Quality Standards

Endoscopes and instruments from KARL STORZ have a high standard of quality. This is assured by our cooperation with official inspection bodies. The safety of instruments, of appliances and, of course, of the users is of utmost importance to KARL STORZ.

### TÜV

We guarantee the accordance with international and national standards by detailed tests and approvals of our equipment in cooperation with the official inspection body TÜV. Therefore, safety tests are undertaken at every conclusion of production on each and every item and the whole production process and business procedures are observed. One example is our product TECHNO PACK® T.

### ASNT

The KARL STORZ Industrial Group has been a partner of ASNT since June 2007. As a part of the “American Society for Nondestructive Testing” we develop innovations and new technologies together and are therefore able to give these directly to our customers.

### BZEE

Members and partners of BZEE make it their mission to develop future-oriented training programmes tailored to meet the qualification demands of the industry.

### KARL STORZ is also part of other committees all over the world:

- ISO/TC 172/SC 5/WG 6 (Endoscopes)
- NA 027 Standards Committee for Precision Mechanics and Optics
- NA 027-01-22 AA Technical Committee for Endoscope Systems
